DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-4 and 9-11, drawn to a composition of BPI, stabilizing copolymer and poloxamer surfactant, classified in class 424, subclass 405
- II. Claims 5-8 and 12-14, drawn to a method of treating bacterial and/or fungal infections, classified in class 514, subclass 12.

The inventions are distinct, each from the other because of the following reasons:

Invention I is related to Inventions II as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the composition of Invention I can be used in a materially different process such as isolation of proteins to which BPI binds, e.g. specification page 4 line 17, LPS binding and neutralization.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

A telephone call was made to Janet M. McNicholas, Ph.D. on March 19th, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sheridan K Snedden whose telephone number is (703) 305-4843.
